

PHYSICAL THERAPIST ASSISTANT

BCCC
Baltimore City Community College

Accredited by The Commission
on Accreditation in Physical
Therapy Education
(CAPTE).

The Physical Therapist Assistant program instructs students on restoring and maintaining physical function, wellness, fitness, and quality of life. Physical therapist assistants work as part of a rehabilitation team to provide physical therapy under the direction and supervision of a physical therapist. After evaluating the patient and developing a plan of care, the physical therapist assistant helps implement the care plan utilizing a wide variety of skilled interventions. Techniques, equipment and exercises to recover mobility and maximize the patient's physical abilities are taught.

Endless Career Options

Upon satisfactory completion of the program, students will graduate and be eligible to apply for national licensure, which is required in most states to practice as a physical therapist assistant.
