

# BCCC

Baltimore City Community College

## ARTS AND SCIENCES TRANSFER, **PSYCHOLOGY**

Area of Concentration  
Associate of Arts

Psychology is a behavioral science that emphasizes the understanding of behavior (feelings, actions, and thoughts) of individuals.

Psychology, as a science, is most closely related to the biological sciences, although its application often involves personal and/or cultural philosophical beliefs or values. Students who major in psychology are expected to be able to think critically and scientifically about behavior and be able to apply the principles of psychology to the understanding of behavior.

Increasingly, highly motivated students seeking careers in law, medicine, pharmacy, business, education, government service, journalism, the visual arts, music, the social sciences, languages, and other fields are finding that psychology is an excellent foundation.
