WHO WE ARE
Founded in 1947, Baltimore City Community College (BCCC) is Maryland’s only state-sponsored community college. In addition to the campus located at 2901 Liberty Heights Ave., BCCC has multiple learning sites across the city offering career training, English language services, adult literacy and GED preparation courses. Through its Business and Continuing Education Division located at 710 E. Lombard St., students receive training, certification, and licensure in areas such as multi-skilled medical technician, telecommunications, and pharmacy technician.

Students turn to BCCC for the affordable, accessible, quality programs they need for career preparation, technical or life skills training, and transfer to a four-year college or university. With personal attention and support of a distinguished, dedicated faculty, BCCC meets students where they are and guides them forward. Available are credit and noncredit offerings. Under the leadership of President and CEO Dr. Gordon F. May, BCCC serves as an active partner in local, state and federal efforts to address workforce needs in high-demand career fields.

DISTINGUISHED AND INNOVATIVE PROGRAMS
BCCC is the only institution in Maryland to offer an associate degree in robotics technology. The program received a $1.5 million grant from the National Science Foundation to boost student participation, with a special focus on minorities.

Year Up is a national one-year, intensive training program that provides underserved young adults with a combination of hands-on skill development, college credits and corporate internships. The Year Up partnership with BCCC produced the first-ever campus-based program, now a model for other community colleges.

The Life Sciences Institute (LSI) at the University of Maryland Biopark is home to the College’s biotechnology program. At this state-of-the-art facility, BCCC students learn in close proximity to excellent university and private industry researchers and gain both academic and ‘real-world’ work experience. LSI students have been placed in paid internships and full-time jobs.

The BCCC Upward Bound Math and Science program, with a five-year, $1.25 million grant from the U.S. Department of Education, is strengthening the math and science skills of students from nearby high schools. The innovative program advances a U.S. Presidential mandate to qualify urban and minority students to pursue postsecondary degrees and careers in the promising fields of science, technology, engineering and math (STEM).

NON-CREDIT PROGRAMS OFFERED (PARTIAL LIST)
The Business and Continuing Education Division (BCED) supports economic growth in the Baltimore Metropolitan Area by serving over 9,000** students in courses designed to create opportunities for personal growth and professional development.

Hospitality and Tourism
Health Care Certifications
Warehouse Technician
Weatherization
Nursing Assistant
Pharmacy Technician

ASSOCIATE DEGREES AND CERTIFICATES AWARDED (FY 2015)
Associate Degrees Awarded 405
Certificates Awarded 104
Total Awards 509

CREDIT PROGRAMS
29 associate degree programs
16 certificate programs

CAREER PATHWAYS
Career Pathways create clear alignments between BCCC’s programs in five areas:

Business;
Behavioral and Social Sciences;
Pre-health professions;
Science, Technology, Engineering and Mathematics (STEM); and
Visual and Performing Arts.

Each Pathway has an advisor designated from the First-Year Experience Program and the Student Success Center to provide information across academic departments and advising resources for faculty and staff. To help explore transfer options, the Passport to Completion mentoring program pairs students with faculty and staff mentors.
